✅ **Question 3 of 5**

What kind of test design pattern do you want to follow?

This defines how clean and maintainable your framework will be.

Options (important 👇):

1. **Page Object Model (POM)**
   - Most commonly used
   - Easy to maintain
   - Best for UI-heavy apps
2. **Playwright Fixtures + POM (⭐ Enterprise Standard)**
   - Combines fixtures + reusable components
   - Very scalable
   - Used in large projects
3. **Screenplay Pattern**
   - Advanced & very structured
   - Slightly complex for personal use

👉 Recommended for you:
Playwright Fixtures + POM (Enterprise Standard)

Reply with your choice (you can accept recommendation), and I'll move to the next question 🚀

Playwright Fixtures + POM (⭐ Enterprise Standard)

✅ **Question 4 of 5**

What kind of reporting & CI/CD integration do you need?

This is important for making your framework *production-ready*.

Reporting options:
- **Playwright HTML Report** (default, basic)
- **Allure Report (⭐ enterprise standard)** – rich reports, screenshots, trends
- Both

CI/CD options:
- GitHub Actions
- Jenkins
- Azure DevOps
- None (local execution only)

👉 Recommended combo:
- **Allure Report + GitHub Actions**

Reply with:
- Your reporting choice
- Your CI/CD choice

Then we'll move to the final question 🚀

reporting choice - both and CI/CD - ADO

✅ **Question 5 of 5 (Final)**

How do you want to manage test data, environments, and configuration?

This is critical for scalability.

Options:

1. **Simple (basic personal setup)**
   - `.env` files
   - JSON test data
   - Minimal configs
2. **Moderate (recommended for you ⭐)**
   - `.env` for environments (dev/qa/prod)
   - Separate test data files (JSON/TS)
   - Config-based execution (tags, baseURL, etc.)
3. **Advanced (enterprise-heavy)**
   - External DB / APIs for test data
   - Dynamic environment switching
   - Secrets management (Key Vault, etc.)

👉 Recommended: **Moderate**

Reply with your choice.

Once you answer, I'll give you:

- ✅ Full enterprise Playwright framework structure
- ✅ Folder structure
- ✅ Step-by-step implementation
- ✅ Sample code snippets
- ✅ CI/CD pipeline (Azure DevOps YAML)

We'll basically build your **production-ready framework blueprint** 🚀

Moderate

Perfect 👌 — now we have everything needed to design your **Enterprise Playwright Framework (UI + API)**.

I'll give you a **complete, real-world architecture + step-by-step implementation**.

🏗️ 1. Enterprise Framework Architecture

You are building:

👉 **Playwright + TypeScript + Fixtures + POM + API + Allure + HTML + Azure DevOps**

📁 Recommended Folder Structure

```
│   ├── api.client.ts
│   ├── logger.ts
│   ├── helper.ts
│
├── test-data/
│   ├── users.json
│   └── testData.ts
│
├── constants/
│   ├── endpoints.ts
│   └── messages.ts
│
├── hooks/
│   ├── testHooks.ts
│
├── reports/
│
├── playwright.config.ts
├── package.json
├── tsconfig.json
├── .env
```

2. Step-by-Step Implementation

Step 1: Initialize Project

Bash

```bash
npm init -y
npm install -D @playwright/test typescript ts-node
npx playwright install
```

Step 2: Configure TypeScript

`tsconfig.json`

JSON

```json
{
  "compilerOptions": {
    "target": "ES6",
    "module": "commonjs",
    "types": ["node", "@playwright/test"],
    "strict": true
  }
}
```

Step 3: Environment Configuration

`.env`

```
BASE_URL=https://example.com
API_URL=https://api.example.com
```

Step 3: Environment Configuration

`.env`

```
BASE_URL=https://example.com
API_URL=https://api.example.com
ENV=qa
```

`configs/env.config.ts`

TypeScript

```typescript
import dotenv from 'dotenv';
dotenv.config();

export const ENV = {
  baseURL: process.env.BASE_URL!,
  apiURL: process.env.API_URL!,
};
```

Step 4: Playwright Config

`playwright.config.ts`

TypeScript

```typescript
import { defineConfig } from '@playwright/test';

export default defineConfig({
  testDir: './tests',
  timeout: 30000,
  retries: 1,
```

Anjali G
Go

✅ Step 4: Playwright Config

`playwright.config.ts`

TypeScript

```typescript
import { defineConfig } from '@playwright/test';

export default defineConfig({
  testDir: './tests',
  timeout: 30000,
  retries: 1,

  use: {
    baseURL: process.env.BASE_URL,
    screenshot: 'only-on-failure',
    video: 'retain-on-failure'
  },

  reporter: [
    ['html'],
    ['allure-playwright']
  ]
});
```

🧱 3. Fixtures (Core of Enterprise Design)

`fixtures/base.fixture.ts`

TypeScript

```typescript
import { test as base } from '@playwright/test';
import { LoginPage } from '../pages/login.page';

type Fixtures = {
  loginPage: LoginPage;
};
```

Go

🧱 3. Fixtures (Core of Enterprise Design)

`fixtures/base.fixture.ts`

TypeScript

```typescript
import { test as base } from '@playwright/test';
import { LoginPage } from '../pages/login.page';

type Fixtures = {
  loginPage: LoginPage;
};
```

```typescript
export const test = base.extend<Fixtures>({
  loginPage: async ({ page }, use) => {
    await use(new LoginPage(page));
  },
});
```

🌐 4. Page Object Model (POM)

`pages/login.page.ts`

TypeScript

```typescript
import { Page } from '@playwright/test';

export class LoginPage {
  constructor(private page: Page) {}

  async navigate() {
    await this.page.goto('/login');
  }

  async login(username: string, password: string) {
    await this.page.fill('#username', usernam
    await this.page.fill('#password', password);
```

🔌 5. API Layer (Enterprise Style)

`utils/api.client.ts`

TypeScript

```typescript
import { request } from '@playwright/test';

export class APIClient {
  async get(endpoint: string) {
    const context = await request.newContext();
    return context.get(endpoint);
  }
}
```

🧪 6. Sample Tests

UI Test

TypeScript

```typescript
import { test } from '../../fixtures/base.fixture';

test('Login Test', async ({ loginPage }) => {
  await loginPage.navigate();
  await loginPage.login('user', 'password');
});
```

API Test

TypeScript

```typescript
import { test, expect } from '@playwright/test';
```

🧪 6. Sample Tests

UI Test

TypeScript

```typescript
import { test } from '../../fixtures/base.fixture';

test('Login Test', async ({ loginPage }) => {
  await loginPage.navigate();
  await loginPage.login('user', 'password');
});
```

API Test

TypeScript

```typescript
import { test, expect } from '@playwright/test';
import { APIClient } from '../../utils/api.client';

test('Get Users API', async () => {
  const api = new APIClient();
  const response = await api.get('/users');

  expect(response.status()).toBe(200);
});
```

📊 7. Reporting Setup

Install:

Bash

```bash
npm install -D allure-playwright
```

Ask anything

📊 7. Reporting Setup

Install:

```bash
npm install -D allure-playwright
```

Run:

```bash
npx playwright test
npx allure generate ./allure-results --clean
npx allure open
```

🔄 8. CI/CD with Azure DevOps

`azure-pipelines.yml`

```yaml
trigger:
- main

pool:
  vmImage: 'ubuntu-latest'

steps:
- task: NodeTool@0
  inputs:
    versionSpec: '18.x'

- script: |
    npm install
    npx playwright install
    npx playwright test
```

steps:
- task: NodeTool@0
  inputs:
    versionSpec: '18.x'

- script: |
    npm install
    npx playwright install
    npx playwright test
  displayName: 'Run Playwright Tests'

- task: PublishBuildArtifacts@1
  inputs:
    pathToPublish: 'playwright-report'
    artifactName: 'TestReport'
```

🧠 9. Enterprise Best Practices

- ✅ Use **Fixtures instead of global setup chaos**
- ✅ Keep **UI & API separate but reusable**
- ✅ Centralize:
  - Config
  - Test data

🧠 9. Enterprise Best Practices

✅ Use **Fixtures instead of global setup chaos**
✅ Keep **UI & API separate but reusable**
✅ Centralize:

- Config
- Test data
- Endpoints

✅ Always:

- Retry flaky tests
- Capture screenshots/videos
- Use tags (`@smoke`, `@regression`)

🚀 What You Now Have

You now own a **production-level framework design** used in companies.

👉 Next Step (Optional but Recommended)

I can help you further with:

- 🔹 Add **authentication handling (token/session reuse)**
- 🔹 Add **parallel execution strategy**
- 🔹 Add **custom logger + reporting enhancements**
- 🔹 Add **BDD (Cucumber) integration**
- 🔹 Convert this into a **real GitHub repo structure**

Just tell me:
👉 *"Take this to advanced level"*
